Jiaxin YUAN

PhD Candidate in Computer Science — Process Mining & Machine Learning

LAMSADE, Université Paris-Dauphine – PSL • Based in Paris, France

jiaxin.yuan@dauphine.psl.eu

jiaxin-yuan.github.io jiaxin-yuan-355a81220

Education

PhD in Computer Science **Nov. 2023 – Aug. 2027 (expected)**

LAMSADE, Université Paris-Dauphine – PSL, Paris, France

- Thesis: *Leveraging Machine Learning and Deep Learning for Enhanced Predictive Process Monitoring in Business Processes.*
- Supervisors: Daniela Grigori (Université Paris-Dauphine – PSL), Han van der Aa (University of Vienna).

M.Sc. Business Informatics **Sep. 2021 – Oct. 2023**

University of Mannheim, Mannheim, Germany

- Specialisation: Data Science, Process Mining and Machine Learning.

B.Sc. Information Management and Information Systems **Sep. 2017 – June 2021**

Sichuan Agricultural University, Sichuan, China

Publications & Working Papers

- **Yuan, J.**, Grigori, D., & van der Aa, H. (2024). *Enhancing Predictive Process Monitoring Using Semantic Information.* **ICPM 2024**, ML4PM Workshop, pp. 293–305. Springer.
  Uses large language models to extract the status of business objects from event data and feeds this semantic information into predictive models, improving outcome-oriented and next-activity prediction.
- **Yuan, J.**, Grigori, D., & van der Aa, H. *Probabilistic Forecasting of Business Process Executions with Neural Temporal Point Processes.* Preprint, arXiv:2609.21382.
  Predicts the next activity and remaining time as full probability distributions, handling events with identical timestamps; better-calibrated than deterministic baselines and cheaper at inference.
- **Yuan, J.** et al. *Causal Mechanisms for Out-of-Distribution Generalisation in Process Prediction.* Ongoing.

Teaching Experience

Doctoral Teaching Assistant **Sep. 2024 – present**

Université Paris-Dauphine – PSL, Paris, France

- Teach BSc and MSc courses on the MIAGE (information systems for business management) and IASD (AI, systems, data) programmes: Machine Learning, Artificial Intelligence, Data Science & Machine Learning Project, and Operating Systems (Linux and C).

Professional Experience

Research Assistant — Speech Emotion Detection **Aug. 2022 – May 2023**

inES, University of Mannheim, Mannheim, Germany

- Designed a speaker-diarisation pipeline and voice gender classifiers (XGBoost, Random Forest, fine-tuned ResNet50), reaching **93%** speaker-separation accuracy.

Technical Skills & Languages

Programming & Tools	Python (PyTorch, scikit-learn, pandas, PM4Py), SQL, C, Java, R; Linux, Git, Docker
Languages	Chinese (native), English (C1), French (B2), German (B1)
